## OPEN SOURCE SOFTWARE AVAILABLE IN COLLEGE LIBRARY

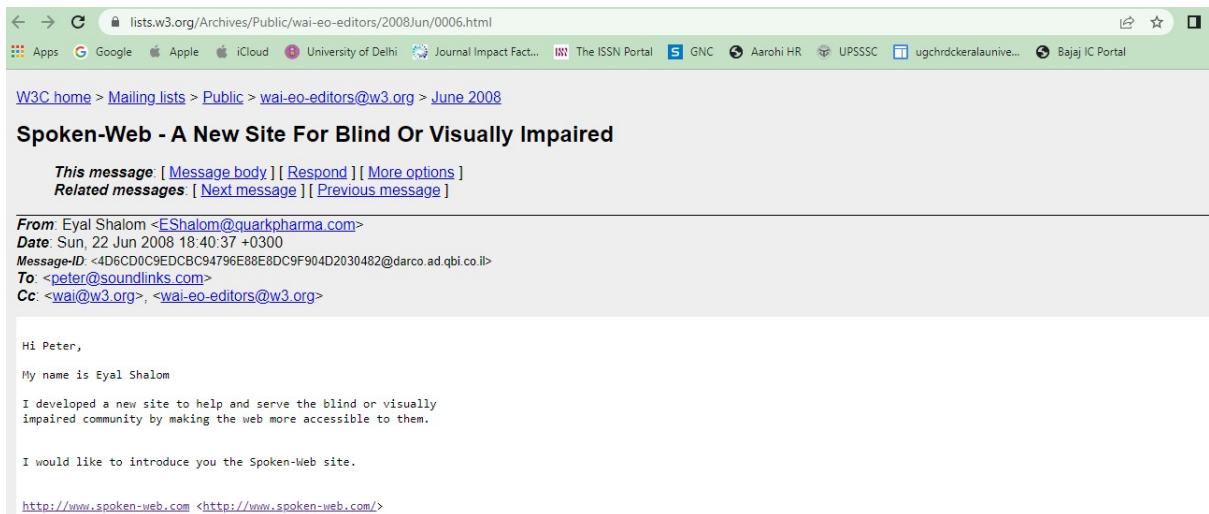

### Free Screen Readers for Blind Or Visually Impaired Users

❖ NVDA (Windows) <https://www.nvaccess.org/>

This free and open source screen reader has a synthetic voice that reads whatever the cursor hovers over, and can be used directly from a USB stick, making it ideal for students.

## ❖ Spoken Web (Internet Explorer)

Spoken-Web is a Web portal, managing a wide range of online data- intensive content like news updates, weather, travel and business articles for computer users who are blind or visually impaired. The site provides a simple, easy-to-use interface for navigating between the different sections and articles Using the keyboard to navigate, a person who is blind or who has a visual impairment can hear the full range of an article content provided in a logical, clear, and understandable manner.

## ❖ ChromeVis (Google Chrome)

Google ChromeVis is a Google Chrome extension that magnifies any selected text on a webpage. The magnified text is displayed inside of a separate lens and preserves the original page layout. Users can change both the lens text *color* and the lens background *color*.

#### ❖ ChromeVox (Google Chrome)

Google ChromeVox is a Google Chrome screen reader extension for visually impaired users.
